<p>P401 - Identification of Asbestos in Bulk Samples This module provides theoretical and practical knowledge in the techniques of asbestos sample identification using polarised light microscopy (PLM).</p>	 Certified by BOHS Duration 3 days
<p>P402 - Building Surveys and Sampling for Asbestos This module provides background and practical knowledge in surveying buildings for the presence of asbestos and how to take bulk samples. It also provides general guidance on management procedures to help minimise exposure to identified asbestos.</p>	 Certified by BOHS Duration 3 days
<p>P403 - Asbestos Fibre Counting This module provides theoretical and practical knowledge in the techniques of fibre counting of asbestos air samples using phase contrast microscopy (PCM). In conjunction with P404 this will cover the requirements for 4-stage clearance testing.</p>	 Certified by BOHS Duration 2 days
<p>P404 - Air Sampling and Clearance Testing of Asbestos This module provides theoretical and practical knowledge in the techniques of air sampling and clearance testing of asbestos. In conjunction with P403 this will cover the requirement for 4-stage clearance testing.</p>	 Certified by BOHS Duration 2 days
<p>P405 - Management of Asbestos in Buildings This module aims to provide practical knowledge and skills to be able to manage asbestos in buildings and a knowledge base to audit asbestos removal projects.</p>	 Certified by BOHS Duration 4 days
<p>P406 - Supervision and Management of the Safe Removal and Disposal of Asbestos This module provides the student with the practical knowledge and skills to supervise and/or manage asbestos removal projects. (See website for dates).</p>	 Certified by BOHS Duration 4 days
<p>P407 - Managing Asbestos in Premises, the Duty Holder Requirements This module provides a practical knowledge and the skills to manage asbestos in premises and to provide a basic knowledge of asbestos management plans, policies and procedures, their implementation and checks on effectiveness.</p>	 Certified by BOHS Duration 3 days
<p>S301 - Asbestos and other Fibres This module enhances the student's knowledge of occupational hygiene practice in relation to fibrous dusts. The module concentrates on asbestos, but other fibres, eg. MMMF, Aramids, etc., which are increasingly finding uses in industry are also covered.</p>	 Certified by BOHS Duration 5 days
<p>(UKATA CAT A) Asbestos Awareness All asbestos awareness courses are 'tailored' to suit the needs of your business and are undertaken over 1/2 or full day. Whether a general overview for delegates who require basic knowledge or a focused maintenance strategy, AEC can build a course to suit your needs.</p>	 Duration 1/2 - 1 day
<p>(UKATA CAT B) Non-Licensed Asbestos Removal Training It is a legal requirement that all staff who may come across asbestos in their day to day work have been provided with asbestos awareness training. If they will intentionally work on asbestos they must have had the appropriate training specific to the tasks they will undertake.</p>	 Duration 1/2 - 1 day
<p>P901 - Legionella, Management and Control of Building Hot and Cold Water Services The module provides a background and overview of the risk of legionella infection and how it can be controlled in domestic type hot and cold water systems. This course is a pre-requirement before P902 course - management and control of evaporative cooling systems and other high risk systems.</p>	 Certified by BOHS Duration 1 day
<p>P902 - Legionella, Management and Control of Evaporative Cooling and other High Risk Systems The module provides a background and an overview of the risk of Legionella infection and how it can be controlled in evaporative cooling and other high risk type Systems. It is a requirement of this course that candidates have successfully completed P901 - Legionella, Management and control of domestic type hot and cold water services.</p>	 Certified by BOHS Duration 1 day
<p>P400 Based Pre Assessment For delegates considering BOHS P402/P405 training. (See website for details).</p>
